The data set has a duration of 30 .Usefulness of the survival analyses in a regional biologic tissue bank. In order to assess the prognostic value of immunohistochemical parameters, the analysis of survival data was performed in a regional biologic tissue bank, and the usefulness of the survival analyses in such a database was verified. The fact that it can be used to retrospectively determine the prognosis of patients whose conditions have been changed by the availability of new treatment modalities and/or related technological progress, which would take place in the next few years, and which might modify the true time-dependent characteristics of the available endpoints was confirmed. Moreover, a good correlation was found between the survival estimation obtained by univariate and multivariate analysis. This is probably due to the fact that although the analysis of survival data is not the sole reason of establishing a biologic tissue bank, it represents one of its strong, unifying objectives. In this thread I will be listing the players I would consider trading for. Obviously at some point in time or another we will all be trading and this list is by no means final, but I want to try and get a good feel for what I would be willing to do. I also would like to get a good idea as to what I should pay for these guys, I think this will be the best way to go. TO - Forwards - You guys need to do something about forward depth, move out the likes of Volchenkov and Blunden. Those two guys have been overpaid for quite some time now and need to go. As well, when you have to trade for goons because of lack of talent, you don't have a good team. Someone needs to realize this and fix it. GOALIES - You have a bunch of good goalies, but I think a top flight
